Diabetes

HARMONIZING THE BODY'S STRESS & ENERGY RESPONSES

A specialized blend of adaptogens, herbs, and amino acids to help regulate the body's stress response and promote cortisol balance. Reduce damage from stress at a biological level and shield the body from its biological damage.

Ashwagandha adaptogen which can re-balance neurotransmitters and reduce cortisol. Studies have shown positive effects on stress assessment scales. Works by activating receptors for the calming neurotransmitter GABA. Potent mood regulator - helps to restore a sense of calmness under stress. Has been shown to improve resilience to emotional and physical stress, supporting immune system response, and regulating sleep.

L-Theanine naturally occurring amino acid found in green tea that promotes

relaxation by reducing stress and anxiety levels. Helpful for quieting the mind when you begin to feel overwhelmed and your mind begins to race.

Phosphatidylserine has been found to reduce stress-induced excretion of cortisol. Can reduce the cortisol response to overtraining in athletes.

Eleuthero Root & Rhodiola Rosea adaptogens which can increase resistance to a variety of stressors. Used to support the nervous system, mood regulation, mental clarity, and the sleep cycle. Studies have shown improvements in mental performance, mood stability, and sleep patterns

Chinese Skullcap Root contains antioxidants appear to downregulate the effects of oxidative stress on various tissues in the body including the liver. It also supports the body in having a healthy in ammatory response and promotes normal cellular growth.
